

The Yugoslav Biophysical Society &
the School of Biology, University of Belgrade
have the pleasure of inviting you to attend the
International Biophysics Workshop “Academician Radoslav K. Andjus”
on Imaging in Neurosciences and Beyond
Sveti Stefan (Serbia & Montenegro), September 23-30, 2006.

Supported by
International Brain Research Organization

In cooperation with
COST/ESF

AIM:

Advanced knowledge of the imaging techniques in biomedicine esp. neuroscience, preferably for *young researchers* and *postdoctoral students* (25-30). Allowing for the flow of experiences and ideas between participants and expert teachers. Forming an interface between the Workshop and the COST action “Physiological modelling of MRI image formation”. Manuscripts are welcome and will be published as proceedings on CD.

Topics:

- 1) Magnetic resonance imaging
- 2) Advanced microscopy techniques
- 3) Imaging in electrophysiology
