

Dear attendees of the National Meeting of PhD Students in Neuroscience,

we are pleased to inform you that the journal “*Frontiers in Molecular Neuroscience*” accepted our proposal for a Special Issue dedicated to publish full research reports, review articles meta-analyses or viewpoints from the Young Neuroscientists attending the Meeting on June 11, 2022.

In order to collegially converge to the most interesting and transversal Research Topic for this Special Issue, you are kindly invited to select among one of the following Titles by writing your preferred one in the Abstract Form submission email to iscrizioni.sinsphdmeeting@unibs.it:

- ***Emerging perspectives in brain research***
- ***Synaptic function in physiology and pathology***
- ***Advances in brain disorders: from mechanisms to therapeutic targets***

The most voted title will be selected.

Frontiers in Molecular Neuroscience (IF: 5.639) is a multidisciplinary open-access journal at the forefront of disseminating and communicating scientific knowledge and impactful discoveries to researchers, academics and the public worldwide. We thus believe that this Special Issue can offer a special opportunity to disseminate the research advancements presented during the National Meeting of PhD Students in Neuroscience.

Please note that all submissions will undergo rigorous, fast, fair, and open peer review. Studies examining all levels of inquiry, from basic to applied or clinical science and also methodological papers using a wide range of techniques and model systems, are welcome.

We look forward your heartfelt participation to this initiative.
